

Case Study

New Cycle Facilities for Dorset County Council Staff

Employees at Dorset County Council's headquarters in Dorchester now have state-of-the-art bicycle storage thanks to the Council's commitment to their Green Transport Plan, which includes the objective to increase bicycle commuting amongst staff.

The individual **cycle-safe**[®] lockers have been installed at County Hall by **Cycle-Works Ltd**. Tony Mackle, Cycling Officer said, "The lockers are proving to be very popular with employees who want a secure place to store their bicycles. The lockers were specified because they offer a long-term solution to the problem of cycle parking and reduce dependency on car parking spaces."

The unique **cycle-safe**[®] lockers are made of compression moulded reinforced fibreglass, with stainless steel locks and components.

As well as the positive, stylish image the lockers give, benefits include fewer stolen accessories such as panniers and lights and healthier, fitter staff!
