

Case Study

Extra **cycle-safe**[®] lockers for Cycle-Rail Commuters

cycle-safe[®] lockers were first installed at Eastleigh and Southampton Airport Parkway stations over two years ago, and have proved to be so popular with customers that further lockers have been installed at both stations to cope with demand.

Local bicycle commuters really appreciate the convenience of having their own dedicated lockers, enabling them to store their bikes and accessories in confidence. The lockers are available free of charge to season ticket holders on payment of a refundable deposit of £20.00.

The locker programme has the full backing of Eastleigh Borough Council, Hampshire County Council, South West Trains and Railtrack, who are keen to promote cycling to the stations.

Anneli Hampson, Eastleigh Borough Council's Cycling Officer said: "Cycle lockers are proving very popular with the committed cycle-rail commuter and we envisage that demand will continue to grow."

High security is valued by today's bicycle commuters with their expensive bikes, as well as helmets and other equipment that they don't want to carry to work on the train. With the **cycle-safe**[®] locker, bikes and belongings are protected from potential thieves as well as the elements.
